

INTERCOOL FOOD TECHNOLOGY LTD.

Business Profile

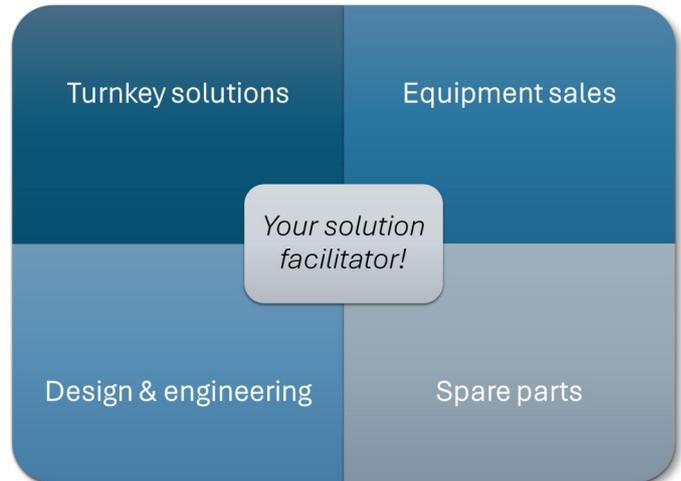

Your solution facilitator!

Your Facilitator in Food Industry Solutions

INTERCOOL FOOD TECHNOLOGY LTD. is a Danish company with over 65 years of experience delivering turnkey solutions for the global food industry.

We specialize in the design, planning, installation, and commissioning of meat processing facilities, offering a full spectrum of services including consultancy, equipment supply, and spare parts.

Key Benefits in Collaborating with INTERCOOL

At INTERCOOL, we strive to be your trusted collaborator. We deliver tailored, high-quality solutions at competitive prices. Our approach blends practical industry experience with forward-looking innovation to meet the evolving needs of the food sector.

We provide independent recommendations, free from proprietary ties, and we offer unbiased, best-fit equipment solutions.

Cost Efficiency

Without in-house manufacturing, we provide flexible and cost-effective options.

Premium Technologies

We source top-tier process solutions, customized to your operations.

Cross-Disciplinary

Expertise Our broad capabilities enable innovative, adaptable solutions.

Collaborative Process

We engage your team to ensure alignment with your goals.

Accelerated Delivery

Streamlined workflows reduce time from concept to implementation.

Industry Knowledge

Deep expertise in meat processing informs every project.

Optimized Infrastructure

We design for efficiency, hygiene, and clear process separation.

Supplier Neutrality

As an independent advisor, we offer objective, vendor-neutral guidance.

Holistic Design

Our solutions prioritize layout, hygiene, safety, and product quality.

Global Reach & Expertise

INTERCOOL FOOD TECHNOLOGY is a globally operating company specializing in the design and construction of comprehensive slaughterhouses and meat processing facilities. Its expertise encompasses advanced processing plants, cold storage units, rendering facilities, and a wide range of related infrastructure.

Drawing on the legacy of Denmark's globally recognized meat industry, we exemplify the high standards of competitiveness, product quality, and food safety that have earned international acclaim.

With a proven track record of over 200 successfully completed projects worldwide, we demonstrate extensive experience and a strong capability to deliver tailored solutions across diverse markets.

Comprehensive Solutions

INTERCOOL FOOD TECHNOLOGY is dedicated to excellence in all aspects of the food industry, and if required, assuming total responsibility for every project.

We manage projects at every stage, from farm to the dispatch of finished products, taking full technical responsibility and can assist in investigating possibilities of financial support.

Our involvement spans all levels, regardless of the project size. In the technical domain, we undertake:

- Product optimization
- Quality improvement
- Processing
- Process optimization
- Efficiency improvement

We cater to tomorrow's demands – every single day. We are continuously exploring new methods for the production of future foods. Consumer demands of higher quality are a natural outcome of societal development, including the food sector.

Although consumer demands vary globally, one common feature remains: Tomorrow's consumers demand convenient and fresh food which is safe, healthy, nutritious, and natural. We actively participates in the research necessary to ensure that the food industry can consistently meet the consumer demands of tomorrow.

Methodology & Work Plan

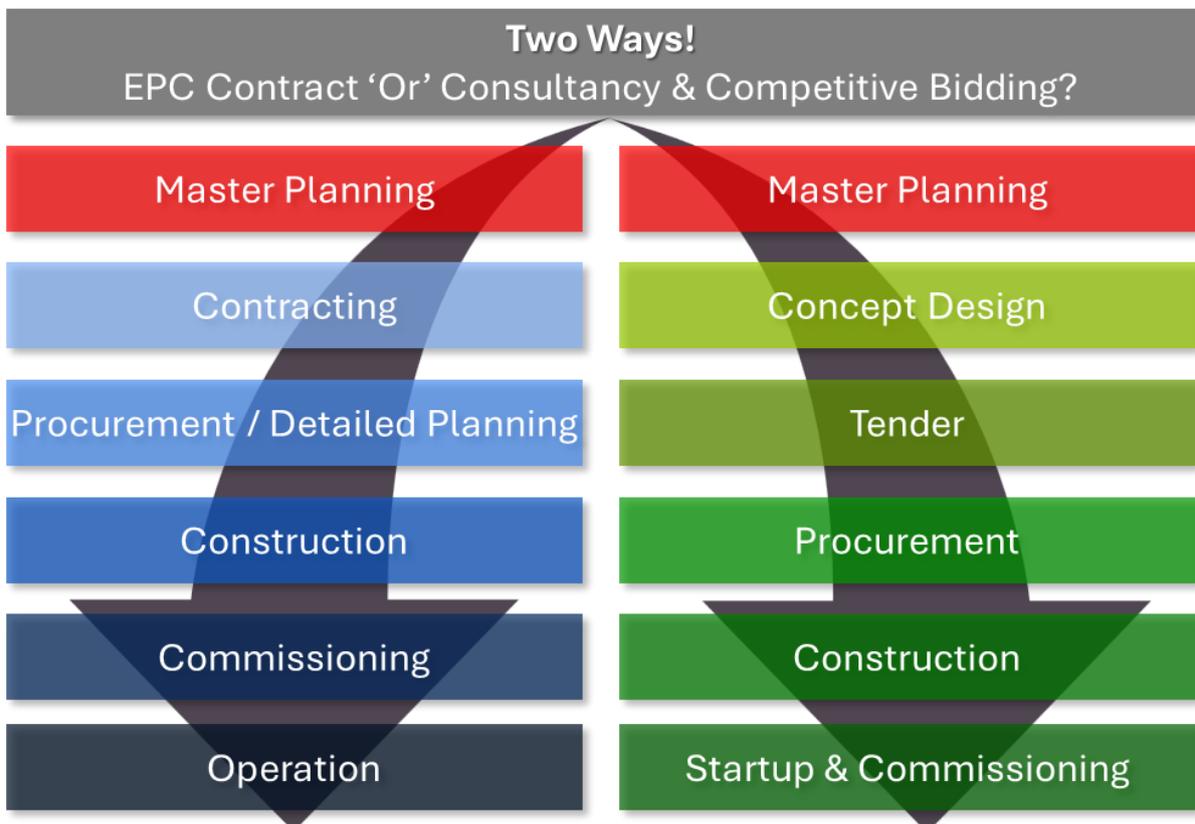

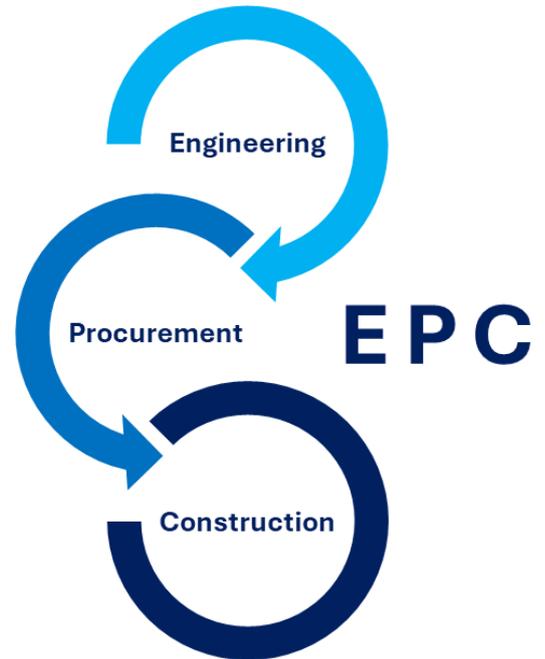

INTERCOOL FOOD TECHNOLOGY delivers tailored solutions through collaboration with industry and academic institutions. We offer up-to-date expertise, flexibility, financial assistance, and full technological responsibility. Client staff involvement ensures compliance and reduces time from concept to commissioning.

We are your collaborator every step of the way – from ‘Idea to Reality’!

With **INTERCOOL FOOD TECHNOLOGY** as your collaborator, you can rest assured that your project is in capable hands. Our practical industry expertise applied throughout the project ensures the best solution at the most competitive price.

We offer two ways from ‘Idea to Reality’:

1. An EPC contract.
2. Design, Engineering and Specification to a competitive tendering.

Our Story

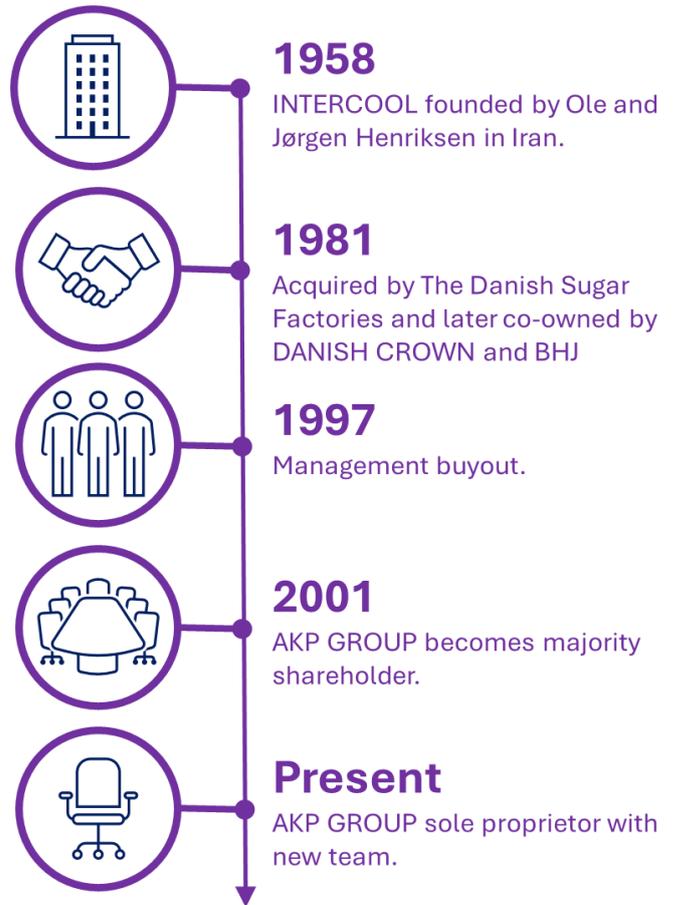

INTERCOOL FOOD TECHNOLOGY is a Danish company with a long history with experience of delivering turnkey solutions to the global food industry.

Established in 1958 by Ole and Jørgen Henriksen, the company began by supplying processing plants to Iran and later expanded across the Middle East and North Africa.

In 1981, we were acquired by The Danish Sugar Factories (later Danisco) and became part of Pacilac Danish Turnkey Dairies. It later gained co-ownership from DANISH CROWN and BHJ GROUP, including WOLFKING Denmark.

A management buyout in 1997 led to new ownership, and in 2001, AKP GROUP became the majority shareholder.

As of 2025, AKP GROUP is the sole proprietor, continuing to support innovation and growth.
